

Kramer's Quicklaunch for Education is the first solution entirely designed for the needs and applications of the Education sector. It was developed by education experts and aimed for the higher education market and training centers. Quicklaunch for Education is Simple, easy-to-use, secure, and intuitive.

With the EDU Beta Configuration Services, Kramer works with administrative and technical resources remotely to assist with configuration of Quicklaunch. This includes providing insight into Quicklaunch capabilities and customizing it so you have all your teaching tools in one place. Allow the Quicklaunch team to assist and *make it your own*.

Quicklaunch Templates are patterns or blueprint of the classroom Quicklaunch interface that are saved as Quicklaunch Template Files (QLS). A template contains configuration information for the class and includes display settings, themes (colors, logo, etc.), action tiles, calendar and system settings. It provides IT an easy way to rollout or make changes to multiple spaces.
